

Hello,

We appreciate your interest in MissionTo.org. Below are details regarding their work in Ukraine to date.

On February 25th, 2022, friends Mark Kreynovich and Dillon Carroll turned 24 on their shared birthday, the day after the Russian invasion of Ukraine. They didn't have the heart to celebrate, so they bought same-day tickets to Europe to help refugees.

Their goal was to raise \$5K and help for one week. One year later, they live in Kyiv, positioned between their east and west operations, and have raised over \$600,000 from 1,800+ people worldwide under their organization [www.MissionTo.org](http://www.MissionTo.org). Their efforts have evacuated thousands from occupied territories, fed thousands more, repaired residential homes, and provided medical care to the most brutal conflict zones.

Due to their extensive and verified in-country network, they moved much-needed food supplies into besieged Mariupol while Russians repeatedly turned the International Red Cross away and attacked a maternity hospital killing mothers and newborns. In addition, they have supplied desperately needed medical reserves to the eastern front lines, including a full-fledged mobile hospital unit with two operating rooms to the heaviest action in Bakhmut in 2023. These are just some of their efforts to date.

Thanks to the generous support of their numerous donors worldwide, MissionTo.org has:

- Procured **\$500,000+ of critical equipment & necessities**, including mobile hospital and ambulatory vehicles, pharmaceuticals/medicines (e.g., insulin, chronic care medications), medical devices (handheld ultrasounds for shrapnel removal), suture instruments, power banks, food & more
- **Coordinated the preparation and delivery of supplies throughout Ukraine**, including the country's hardest-hit regions like Kharkiv, Mariupol, and Kherson
- **Organized a volunteer evacuation driving team** that evacuates civilians and delivers humanitarian aid in Ukraine's southern occupied territories
- **Transported refugees (mothers with children, the elderly, and pets)** from border points to processing destinations, voluntary hosts, and more
- Secured **temporary housing and recurring grocery assistance** for refugee families in the European Union

They have many hours of in-country footage illustrating their daily life in wartime Ukraine, documenting humanitarian aid runs to frontline locations, and capturing a unique Ukrainian-American angle. One current project, in partnership with Kharkiv NGO "Ordinary People" and Liev Schreiber's "BlueCheck Ukraine," is repairing and insulating damaged apartments across Kharkiv City's most intensely afflicted residential neighborhoods. They are also outfitting two municipal aid centers, "points of warmth," in the recently liberated Kharkiv Oblast.

[MissionTo.org](http://MissionTo.org) actively communicates the changing needs of hospitals, medical field points, and aid centers on the ground. Based in Kyiv, they function as a rapid-response team addressing the most pressing needs on an immediate feedback loop. [MissionTo.org](http://MissionTo.org) has a 501(c)(3) fiscal sponsor, a Baltimore-based nonprofit, enabling tax-deductible donations. Details can be found at the end of this letter.

Thank you for your consideration, and we hope we can count on your support during this war.

Gratefully,

Mark & Dillon
